

With a thorough knowledge of logistics supported by vision and creative thinking, we have built an innovative approach to logistics IT solutions. We have a reputation for rigorous analytical skills and powerful, robust solutions coupled with expertly managed integration and implementation.

To us, each client is unique, rightly deserving individual attention, a close affinity with their business objectives and an uncompromising commitment to the provision of excellence. We hold the belief that depth of knowledge and extraordinary effort generates exemplary results.

Ideal fit for purpose solutions delivered on-time and on-budget can only be achieved by first taking meticulous care to fully comprehend the business processes and needs of each individual client. From our extensive modular range we collate the solution with the required functionality to support and manage the stated business processes. **Orion** solutions are rules driven and customers apply rules and constraints as appropriate enabling the flexibility to accommodate the dynamics of change.

The **Orion Star** range of modular solutions are designed and maintained according to this philosophy.
